

**MOSQUITO LIGHT SHIELD,
the simple to use safe alternative
to chemical Mosquito repellents that
is both proven & cost-effective.**

The MOSQUITO LIGHT SHIELD is a unique and patented solution to deter Mosquitos from attacking you, your family and even your pets. Our unique technology is simple, easy to use and effective all you need to do is position your portable lamps turn on and protection starts immediately. You no longer need to cover yourself with chemicals, wear bracelets or burn candles; with the MOSQUITO LIGHT SHIELD you just simply press the button, and it works. The Mosquito Light Shield is very cost effective with a cost per hour of less than 0.1 Euro cent compared with Sprays and lotions that can be as much as 50 Euro cents per hour.

Key Benefits

SAFE

No chemicals
or Deet

NO SKIN CONTACT NEEDED

No allergy, no
irritation.

SIMPLE

easy to use,
flexible fixing.

PORTABLE

Battery
operated,
easy to travel
with

INNOVATIVE EFFECTIVE PATENTED PROFESSIONAL TECHNOLOGY

used by army forces.

COST EFFECTIVE

rechargeable, can
be used for years.

PROVEN

Developed over the
last 10 years – used by
Armed forces
worldwide.

How does the MOSQUITO LIGHT SHIELD work?

Firstly, the patented light technology in our MOSQUITO LIGHT SHIELD product transmits light at a frequency that confuses what Mosquitos see, effectively interfering with the Mosquitos sight "Ocelli" and creating an "alarm reaction" secondly the Patented P15 LED crystal vibrates to create a low frequency soundwave replicating the ultrasonic sound made by its arch predator the Bat when hunting. The Mosquito is therefore both confused and fearful and decides to either settle and hide or fly away to avoid the potential threat.

How do I use the MOSQUITO LIGHT SHIELD?

Using the Mosquito Light Shield could not be easier, just position the light wherever you need it using either the mounting hook or integrated magnet and turn the light on by pressing the on/off yellow button twice (first press with turn the white light on) once on make sure you position the yellow light over the area you need to cover and that's all there is to it. Once complete just place the light on charge via the usb charger ready for the next time you need it.

What about existing solutions?

Traditional methods of repelling Mosquitos typically involve the use of chemicals (DEET) etc. that can be harmful to Humans, animals or the environment or so called "Bug lights" that claim to deter them from flying close. Clearly chemicals can work but at what cost to our health and the environment. Mosquito Repellent Creams & Sprays can cause skin irritation, allergies, skin inflammations and rashes. Numbness & Burning sensation for the eyes and mouth or if ingested, some are poisonous.

Key Features

- PATENTED TECHNOLOGY, DUAL FUNCTION LED
 - Functions as standard LED light
 - Mosquito mode LED light that confuses Mosquito's ability to focus on prey. The special spectrum light creates an "alarm" threat status with the Mosquito.
 - The additional Ultrasonic diode mimics Bats hunting echo location encouraging the Mosquito to land or flee.
 - Targets all Mosquitos.
- DESIGNED & MANUFACTURED IN THE EU.
- INDEPENDENTLY TESTED.
- NON-LETHAL DETERRENT
- USB rechargeable, Battery lasts for 12 hours.

- 2-YEAR WARRANTY
- MULTIPLE PRODUCT OPTIONS AND APPLICATIONS:
 - Outdoors: Camping – Hiking – Caravanning – BBQ`s – Picnics – on the Beach – Fishing- Golf
 - Indoors: Kitchen – Living room – Bedroom – Terrace
 - Commercial: Bars – Beer Gardens – Restaurants – Bakeries
